I am slightly anxious or depressed	15
I am moderately anxious or depressed	10
I am severely anxious or depressed	The worst health you can imagine (= 0) 0
I am extremely anxious or depressed	iiiagiile (= 0) 0 ———

Joint-specific pain

We would like you to indicate the severity of your pain in the above-mentioned joint, by marking a cross on the line from 0 to 10 (where 0 = no pain, 10 = the worst pain you can imagine).

How severe was your pain in the last week?

Joint-specific satisfaction

In connection with the above-mentioned joint problem: if you had to spend the **rest of your life** with the symptoms you have right now, how would you feel about it?

very satisfied

somewhat satisfied

neither satisfied nor dissatisfied

somewhat dissatisfied

very dissatisfied

Level of education

up to 9 years of education (compulsory education)

10 to 13 years of education (vocational education, secondary school, high school)

more than 13 years of education (university, polytechnic, college of higher education, university of applied science)

This form is based on the EQ-5D-5L¹, with two additional validated questions (specific to orthopedics and the relevant operation) and a validated question regarding level of education².

¹⁾The EQ-5D is a generic measuring tool that uses a standardized, preference-based procedure to describe and investigate health-related quality of life.

The survey includes five questions, plus a question about the general state of health independent of medical interventions. The measuring tool is validated and is used internationally.

2) International Standard Classification of Education (ISCED) 2011. Operational Manual. Guidelines for classifying national education programs and related qualifications.

This survey is carried out on behalf of the Canton of Zurich Department of Health. Responsible for content and implementation:
